

Variable speed drives
Altivar 71 / Altivar 61
Make way for *evolution!*

For 3-phase asynchronous motors from 0.37 to 630 kW.

Simply Smart!

Leverage **ingenuity**
and intelligence
for **ease** of use

Altivar 71 / Altivar 61

The *leading edge!*

With this new generation of drives, the expertise and know-how of Schneider Electric within the variable speed drive domain is truly highlighted.

Exceptional performance, advanced functions...whilst always keeping the emphasis on **simplicity**.

Open to all communication networks, applications, users...

The **Altivar 71** constant torque offer and the **Altivar 61** variable torque offer provides **ingenious solutions** for all your particular requirements.

A *powerful* fleet

- IP20, UL Type 1, 3-phase 200 to 240 V:
Altivar 71 from 0.37 to 75 kW
Altivar 61 from 0.75 to 90 kW
- IP20, UL Type 1, 3-phase 380 to 480 V:
Altivar 71 from 0.75 to 500 kW
Altivar 61 from **0.75 to 630 kW**
- IP54, UL Type 12, 3-phase
380 to 480 V:
Altivar 71 from 0.75 to 75 kW
Altivar 61 from 0.75 to 90 kW
- EMC filters integrated class A or B.
- Worldwide offer:
UL, CSA, CE, C-Tick, GOST ...

Remarkable performance

- Up to **220% overtorque** for the Altivar 71 constant torque offer.
- Up to **130% overtorque** for the Altivar 61 variable torque offer.
- Flux vector control with or without sensor for asynchronous motors.
- On-line auto-tuning (FVC).
- Speed or torque control.
- Output frequency up to 1000 Hz.
- Synchronous motor control without sensor.
- Energy saving. 2 pts/5 pts quadratic ratio.

Expandable capabilities

Basic equipment with a wealth of features: application functions, inputs/outputs, communication networks... that can be further extended by:

- input/output extension cards.
- encoder interface cards.
- communication cards.
- Controller Inside programmable card.
- Multipump cards.

Closely related *safety*

Protection at all levels

- **of the motor:** thermal protection - PTC probe or integrated electronic thermal relay, surge limitation,
- **of the machine:** Power Removal safety function (no unintended motor starting), alarm management, external fault management,
- **of the environment:** drive developed in accordance with the Eco-Design principle,
- **of the drive:** protection in the event of overheating, current limitation using hardware and software.

Easy to control...

- Graphic screen with customisable display.
- Plain text with 6 available languages (English, Chinese, German, Spanish, French and Italian) with possibility of adding other languages.
- Navigation button for easily “surfing” through the menus.
- «**Simply Start**» menu for quick start-up and immediate benefit of the full performance of the **Altivar 71** and of the **Altivar 61**.
- Function keys for short-cuts, on-line help or configurable for some applications.
- Continuous display of the operating parameters of the motor.

Altivar 71 / Altivar 61

Evolutionary equipment

Unrivalled basic equipment

With the many functions already integrated in the **Altivar 71** and in the **Altivar 61**, you **reduce the cost of solutions** for your machine. The most economical solution is offered without compromise!

With more than 150 functions available, you benefit from:

- considerably increased flexibility,
- possibilities for reducing the machine cycle time,
- improved performance by processing as close as possible to the control motor,
- a high level of integration.

Integrated Modbus and CANopen

With these two standard networks, you achieve:

- savings in cabling,
- a high data exchange transfer rate,
- direct connection to industrial automation systems.

Dialogue

The graphic terminal can be multipoint connected to several drives. Economical, the **Altivar 71** and the **Altivar 61** are also available with a 7-segment display for ratings up to 15 kW.

EMC mastered

Incorporating level A conducted and radiated EMC filters, the **Altivar 71** and the **Altivar 61** simplifies installation and establishes conformity of the machines for CE marking, without additional costs.

“Power Removal” safety function

Conforming to the machine standard EN 954-1 category 3 and the standard for electrical installations IEC/EN 61508 SIL2, and certified by a competent body (INERIS), it enables:

- machine certification without difficulty,
- elimination of electromechanical redundancies,
- reduced cabling and installation times,
- savings in space in enclosures.

Modular configuration

You require additional inputs/outputs, a particular communication network....

All you have to do is select up to 3 cards from those available. By sizing the **Altivar 71** or the **Altivar 61** yourself, you benefit from both **simplified integration** in your automation system and **optimised costs**.

■ **Input/output extension** cards:

logic inputs, open collector outputs, relays, PTC probe input, analogue inputs, analogue outputs, pulse input.

■ **Communication** cards:

Fipio, Ethernet, Modbus Plus, Profibus DP, DeviceNet, Uni-Telway, INTERBUS, for connection to the main communication networks available on the market.

■ **Controller Inside** programmable card:

Integration of programmes in the drive for decentralisation of the machine automation systems.

■ **Multipump** cards.

■ **Interface cards for incremental encoder**

RS422, open collector, Push-Pull, for:

- obtaining **full torque** even at zero speed,
- increasing **speed and torque precision**,
- increasing dynamic **performance**.

Altivar 71 / Altivar 61

The *Ace* at piloting

The Altivar 71 just like the Altivar 61, easily adapts its drive performance...

Whatever your choice of automation system solution, it always provides excellent efficiency for **improved productivity**.. Access to the means of command, information or to actuators is direct, with complete **transparency**.

Automatic piloting

The **Controller Inside** programmable card transforms the Altivar into a true **automation island**.

- It incorporates **automation functions** appropriate to your profession.
- With its processing as close as possible to the control motor, the movements gain in **speed**.
- Its CANopen master network enables **control of other drives** (Altivar 31, Altivar 61 or Altivar 71) and the exchange of any data.
- This card has **its own inputs/outputs** and access to those of the Altivar.
- The display functions of the graphic terminal are kept for **information and configuration**.
- **Supervision** is available via Ethernet, Modbus (or an alternative communication network).

Semi-automatic piloting

One group of commands is issued by a **programmable controller**, the other by the **operator**.

- The source of commands such as start/stop instructions, references, etc. can be separated. You benefit from **quick reaction times** due to direct processing of information by the drive.
- The switching of these channels enables **adaptation of the piloting to the operating phase**: setting-up, operation or maintenance.
- The control of the drive conforms to the protocol standards in use.
- Using the I/O mode, the networks are accessible to all: the Altivar is controlled in the same way as cabled logic.
- The possibility to supply the control with an external 24 V DC makes **diagnostics always available**.

Manual Piloting

Commands are issued directly by the **operator** via a joystick, pushbuttons, switches or using the **graphic terminal**.

- The numerous **inputs/outputs** enable all the commands and information to be received.
- Commands can also be issued via the **graphic terminal**: start/stop instruction, speed reference, torque reference, PID reference, etc.
- The function keys of the terminal can be **assigned** to the preset speeds or PID references, +speed / -speed, channel switching, etc.
- On a channel switching, the instructions can be duplicated so as not to disturb the operation of the Altivar.

The 3 piloting modes can be combined

All locations

In enclosure

- Savings in space assured, with an IP20 degree of protection: reduced width of drive, side by side mounting...
- Reduction of heat dissipation inside the enclosure by installing the heatsink outside (degree of protection IP54).

On a wall

- Simple installation using mounting kit (protection degree IP21 or UL Type 1).
- Altivar 71 and Altivar 61 in IP54 version

In severe environments

- Resistance assured with Altivar 71 and the Altivar 61 version, conforming to category 3C2 of IEC 721-3-3.

Altivar 71 / Altivar 61

Messages *received 10/10...*

The **Altivar 71** and the **Altivar 61** are professionals of the communication. its messages are clear, precise, illustrated... and the dialogue is also performed according to the requirements of the interlocutor.

Clarity

of the display comprising 8 lines of text and graphics. Legibility from 5 m. 6 languages available: English, Chinese, German, French, Spanish and Italian... with the possibility of simply downloading other languages.

Flexibility

with its remote mounting alternatives:

- on the door of an enclosure, with an IP54 or IP65 degree of protection.
- for multipoint connection to several drives.

Storage of 4 configurations for transfer to other drives.

Simplicity

using the function keys for short-cuts, direct access and on-line help, display of the minimum and maximum values of the parameters

Protection

of parameters, control of their display, password protected, for simplified access to configurations with complete security.

Ergonomic

with its navigation button. With just one finger freely and quickly "surf" the drop-down menu.

Customisation

of parameters, display screens, monitoring line, creation of "user" menu, etc.

The "Simply Start" menu provides you with assistance for obtaining the best from the Altivar 71 as from the Altivar 61 and for protecting your motor.

Configure without being aware of it!

- Many macro-configurations are already integrated that are designed for a wide variety of applications and uses: materials handling, hoisting, general use, connection to communication networks, PID regulation, master / slave, etc. They can easily be modified.
- The architecture of the menus, hierarchical parameter system and short-cut functions enable simple and quick programming, even for the most sophisticated functions.

Altivar 61

Performances on tap!

Altivar 61 is a range specifically for *pumps* and *fans* from 0.75 to 630 kW.

integration in installations subject to difficult environments using the Altivar 61 UL Type 12/IP54:

- IP54 protection for direct mounting on a wall.
- Integrated anti-harmonic solutions.
- Remedies for installation pollution.
- IP54 product with EN 55011 class A or class B (IEC/EN 61800-3) *integrated EMC filters*.

Wide range of integrated functions for variable torque applications:

- Pump and fan macro configurations.
- Zero flow detection, flow limitation.
- Sleep/wake function.
- Smoke extraction function.
- Underload and overload detection.
- PID regulator, PID references.
- Energy saving ratio, 2 pts/5 pts quadratic ratio.
- Alarm.
- Fault configuration.

Altivar 71 / Altivar 61

Eco-Design:

thinking of the future

Within its sustainable development policy, Schneider Electric is committed to environmental friendliness:

"Our products safeguard life, make goods safer and optimise the consumption of energy and natural resources.

We are actively involved in design, production, distribution and recycling processes that are environmentally friendly.

Protection of the environment forms an integral part of our strategic decision making".

The new generation of **Altivar 71 / Altivar 61** drives benefits from an **Eco-Design** approach. The same importance has been given to the "environment" criterion as that for other criteria, such as: performance, quality, ergonomics.... and this applies to each stage of the **life cycle of the product*** (manufacture, distribution, usage and end of life).

Exemplary end of life recovery ...

88% of the parts used for the Altivar 71 are recyclable.

They enable the recuperation of energy (incineration with energy recuperation) or of material (recycling, composting) conforming to the European directive WEEE (Waste Electrical & Electronic Equipment).

With Eco-Design

Without Eco-Design

70 %

Recovery rate imposed by the European directive WEEE.

... due to a strict selection and ideal combination of materials

Materials used for the Altivar have been selected for their minimal impact on the environment. Conformity to the European directive ROHS (Restriction Of Hazardous Substances) that prohibits the use of materials such as lead, chromium 6...

ISO 14 001 certified sites for their manufacturing operations since 1997:

- Pacy-sur-Eure / France
 - Mie / Japon
- and certified for their Eco-Design cycles since 2002.

*For the complete "Product Environmental Profile" document relating to the entire range, please contact Schneider Electric.

Analysis carried out using EIME (Environmental Information and Management Explorer) software and based on international averages.

Altivar 71

Excellent freedom of movement

The **Altivar 71** incorporates a wide range of functions, from very simple to very sophisticated. Its performance is perfectly coordinated for very many applications. With **Altivar 71**, the performance of your machines will soar!

Material handling:

- Reaction time on logic command: $2 \text{ ms} \pm 0.5 \text{ ms}$.
- Positioning on limit switches with optimisation of low speed operating time.

Hoisting:

- Weight measurement processing.
- High speed hoisting.
- Brake feedback control.
- Management of limit switches.

Wood machines:

- Operation up to 1000 Hz.
- Fast controlled stop on supply failure.

Process machines:

- PID regulator dedicated to process.
- High resolution of the reference (1/32000).
- Speed or torque control.
- Connection to main communication networks.
- Connection to common DC bus.

Textile machines:

- Precision of speed whatever the load by using synchronous motor.
- Up to 50Hz bandwidth.
- Traverse control function.

Packaging:

- Control via integrated CANopen network.

For full and detailed information on the Altivar 71 offer, please refer to our catalogue.

Altivar 61

The *power* of the elements!

The Altivar 61 offers you a wide range of functions for your pumps and fans. Its evolutionary design is particularly aimed at meeting your application requirements. The Altivar 61 enables you to touchdown smoothly...

Multipump: water distribution

- With its multipump cards, the Altivar 61 provides **flexibility, user-friendliness and adaptability** for the management of several pumps.
- **Monitoring and full control of the installation** by switching and spreading the wear and tear between pumps.
- Underload and overload detection.
- Detection of absence of fluid..

Ventilation: safety/smoke extraction

- Drive **forced start** function with fault inhibition, selection of running direction and speed reference.
- For high inertia applications, **braking possible** using resistors, **catch on the fly** by speed search regardless of the direction of rotation.
- Regulation of CO₂ by the integrated PI regulator.

Ventilation: Air treatment plant

- **Enhanced comfort with reduced noise pollution** caused by fan operation: jump frequencies, energy saving ratio, adjustment of switching frequency during operation, variable "white noise" frequency.

Selection guide

(6) with integrated EMC class A filters. To order a product with integrated EMC class B filters, add the letter "C" to the end of the reference.

PowerSuite software workshop

PowerSuite CD-Rom for PC

(English, French, German, Chinese, Spanish and Italia) _____ VW3 A8104

Connection kit

for PC _____ VW3 A8106

Adaptor for wireless link

Modbus-Bluetooth® _____ VW3 A8114

USB-Bluetooth® _____ VW3 A8115

Input/output cards

Logic inputs/outputs

1 voltage output, 24 V

1 voltage output, -10 V

1 logic output, relay

4 programmable logic inputs

2 assignable logic outputs with open collector

1 input for 6 PTC probes max. _____ VW3 A3201

Extended inputs/outputs

Same as logic inputs/outputs card +

2 analogue inputs

2 analogue outputs

1 pulse input _____ VW3 A3202

Controller Inside programmable card _____ VW3 A3501

Communication cards

Fipio _____ VW3 A3311

Ethernet _____ VW3 A3310

Modbus Plus _____ VW3 A3302

Profibus DP _____ VW3 A3307

DeviceNet _____ VW3 A3309

Uni-Telway _____ VW3 A3303

INTERBUS _____ VW3 A3304

LonWorks _____ VW3 A 3312

METASYS N2 _____ VW3 A 3313

APOGEE FLN _____ VW3 A 3314

BACnet _____ VW3 A 3315

Multipump cards

ATV38 compatibility _____ VW3 A3502

others _____ VW3 A3503

For full and detailed information on the Altivar 61 offer, please refer to our catalogue.

The efficiency of Telemecanique branded *solutions*

Used in combination, Telemecanique products provide quality solutions, meeting all your **Automation** and **Control** applications requirements.

Simple machines
Altistart 01: 0,37 to 75 kW
Altivar 11: 0.18 to 2.2 kW
Altivar 31: 0.18 to 15 kW

Complex, high power machines
Altivar 71: 0.37 to 500 kW

Pumping and ventilation machines
Altistart 48: 4 to 1 200 kW
Altivar 11...347: 0.18 to 2.2 kW
Altivar 21: 0.75 to 30 kW
Altivar 61: 0.75 to 630 kW

A worldwide presence

Constantly available

- More than 5 000 points of sale in 130 countries.
- You can be sure to find the range of products that are right for you and which complies fully with the standards in the country where they are used.

Technical assistance wherever you are

- Our technicians are at your disposal to assist you in finding the optimum solution for your particular needs.
- Schneider Electric provides you with all necessary technical assistance, throughout the world.
